

LITTLE GIRL: When your mom gives you a kiss or a hug, but you can't see the germs because they're under your skin and your bones are under your skin to make you strong.

LITTLE BOY: By touching your nose or your mouth.

LITTLE BOY 2: Say somebody else touches a game and then you touch them and then they land on your hand.

LITTLE BOY 3: Like they sometimes, people sneeze and like sore and then some of the germs like goes right in.

LITTLE BOY 4: By sneezing on someone, coughing --

LITTLE BOY 3: [makes coughing noise] like that.

YOUNG MAN: Handshake with a friend and you know you might hug a girl or something like that.

LITTLE GIRL 2: If someone sneezes and then they high-five another person it can go from person-to-person.

LITTLE GIRL 3: Ah-chew.

YOUNG GIRL: When people like next to me and they're coughing I get so like antsy and like oh my gosh.

LITTLE BOY 5: When you boogers and you - - nose has boogers and then another friend come in and they going to have a hand shake and you handshake on your boogers hand then it all the germs come inside your body.

LITTLE GIRL: [Shaking head]
